PROFESSIONAL SUMMARY

Full Stack Web Developer and Information Systems graduate from Universitas Gunadarma (GPA: 3.57/4.00), certified as a Data Analyst by BNSP. Experienced in developing scalable web applications and RESTful APIs using Go (Golang), PHP (Laravel), Next.js, and React. Hands-on experience designing normalized relational databases (PostgreSQL/MySQL), integrating payment gateways with real-time webhooks, and optimizing operational workflows.

TECHNICAL SKILLS

Core Languages: Go (Golang), PHP, JavaScript (ES6+), TypeScript, Python, SQL
Frontend Frameworks & UI: Next.js, React.js, Tailwind CSS, HTML5, CSS3, Responsive UI Design
Backend & API: Laravel, Go Standard Library/Gin, RESTful API Architecture, Webhooks
Databases: PostgreSQL, MySQL, Relational Database Modeling (ERD), Normalization
Tools & Engineering: Git, Postman, UAT, Agile/Scrum, Faspay Gateway Integration

PROFESSIONAL EXPERIENCE

Full Stack Developer & Database Engineer (Project-Based) Dec 2025 – Jan 2026

Freelance Client - Bekasi | Residential Dues & Inventory Management System (jatimelatibulogtiga.com)

- Engineered a full-stack web application using **Laravel** and **Tailwind CSS** to digitize citizen administration, reducing manual bookkeeping time by over 60%.
- Designed and normalized a **MySQL** schema managing demographic records, automated monthly billing schedules, and ledger transactions.
- Integrated **Faspay Payment Gateway** with webhook callbacks, enabling real-time payment reconciliation and automatic digital receipt generation.
- Conducted formal **User Acceptance Testing (UAT)** with community administrators, validating operational requirements prior to deployment.

Web Developer (Project-Based) Oct 2025 – Dec 2025

Freelance Client - Remote | Dynamic E-Commerce Catalog Platform (afcindonesian.com)

- Architected a dynamic e-commerce catalog web application using **Laravel** and **MySQL** with administrative management features.
- Implemented optimized queries and database indexing to deliver sub-second product filtering across multi-tier inventory categories.
- Built mobile-first responsive interfaces using **Tailwind CSS** to ensure cross-device compatibility and optimal loading performance.

FEATURED PROJECTS

AutoML Classification Web Platform Sep 2026

Tech Stack: Next.js, Go (Golang), Python, PostgreSQL, LightGBM, REST API

- Built an automated machine learning web platform that automates tabular data preprocessing, model selection, and performance evaluation.
- Developed a high-concurrency **Go (Golang)** API Gateway handling client requests and communicating with a **Python** ML engine via RESTful endpoints.
- Implemented a data dashboard using **Next.js** and **PostgreSQL**, displaying evaluation metrics including Confusion Matrix and ROC-AUC curves.

Modular ERP Operations Dashboard Aug 2026

Tech Stack: React, TypeScript, Tailwind CSS, REST API, Charting Libraries

- Built a component-driven ERP dashboard using **React** and **TypeScript** to track operational KPIs and cross-department activities.
- Integrated real-time REST API endpoints with dynamic visual charts, improving business monitoring efficiency.

EDUCATION & CERTIFICATION

Universitas Gunadarma — Bachelor of Computer Science in Information Systems Graduation: 2026

Depok, Indonesia | GPA: 3.57 / 4.00

- Certified Data Analyst** — Badan Nasional Sertifikasi Profesi (BNSP) / LSP Telematika
